(2) FCF Training Summary

(3) Sample FCF Pilot Designation Letter

- 1. <u>Purpose</u>. To publish FCF policy and program administration of FCFs in Training Air Wings ONE, TWO, and SIX (TW-1, TW-2, TW-6).
- 2. <u>Cancellation</u>. COMTRAWINGONEINST 3710.3E, COMTRAWINGTWOINST 4730.1P, COMTRAWINGSIXINST 3710.3C.
- 3. <u>Background</u>. FCFs are used to determine whether aircraft, airframes, power plants, accessories, and items of equipage are functioning properly while subjected to the intended operating environment. The FCF has two important and distinct purposes:
- a. To determine if an aircraft is safe for flight and mission capable.
- b. To accurately evaluate the quality of maintenance performed.

- 4. Action. General instructions for the conduct of FCFs are contained in references (a) and (b). Specific instructions are contained in references (c) through (f), and the "FCF Procedures" section of this instruction. All profiles shall be accomplished per references (a) through (h) and this instruction. With Wing Commander approval, "pro-and-go" FCFs may be flown for "C", "D", 'E" or "F" profiles in support of logistic and syllabus flights. An FCF checklist, reference (d), (f), or as appropriate, shall be utilized for each flight completing all items designated by letter for the profile to be flown.
- 5. FCF Flight Qualifications. In addition to the requirements in references (a) through (f), the following minimum requirements shall be met prior to receiving training and designation as an FCF Pilot:
 - a. T-45A/C Aircraft
 - (1) 1500 hours total military pilot time
 - (2) T-45A/C hours
 - (a) 500 T-45 hours, or
- (b) 300 T-45 hours with prior FCF Qualification (SNA T-45 flight hours do not count).
 - (3) T-45A and/or T-45C NATOPS qualified.
- (4) Recommended by cognizant squadron Commanding Officer or Training Air Wing Commander.
- 6. FCF Training. The cognizant Wing FCF Program Manager will monitor and document the following minimum required FCF pilot training via enclosure (2):
 - a. T-45A/C (All profiles)
- (1) T-45 FCF standardization brief with the cognizant Wing FCF Program Manager (prior to training flights).
 - (2) Cognizant Wing FCF written examination.

- (3) FCF "A" profile simulator conducted by an FCF standardization pilot.
- (4) Two "A" profile flights (may be performed on actual FCF sorties):
 - (a) One, as an observer in the rear cockpit.
- (b) One, as the pilot at the controls in the front cockpit, with an FCF standardization pilot.
- 7. FCF Pilot Designation. Upon completion of the training outlined in paragraph 6, FCF pilots will be designated by their cognizant Training Air Wing Commander using enclosure (3).
- 8. <u>Waivers</u>. Flight time and FCF training requirements listed in paragraphs 5 and 6 above may be waived when deemed appropriate by the cognizant Training Air Wing Commander.

9. FCF Procedures

- a. Check flights shall normally be conducted with the "minimum crew required." A second NATOPS qualified crewmember may be used in situations such as FCF Instructor Under Training (IUT) flights, rear cockpit gauges/systems check requirements, or as rear cockpit observers for FCF experience. SNAs are not allowed to fly in an FCF. Only designated FCF pilots and FCF IUT pilots may fly in the front seat of an FCF.
- b. Each pilot performing an FCF shall obtain a thorough briefing by appropriate Quality Assurance (QA) work center personnel. The briefing shall describe maintenance performed, requirements for that particular flight, and expected results.
- c. Per reference (b), "FCFs should be conducted during daylight hours within the local flying area in VMC. If necessary to accomplish the assigned mission, unit commanders may authorize check flights under conditions other than the above if in their opinion the flight can be conducted with an acceptable margin of safety under the existing conditions. This authority shall not be delegated. Those portions of the flights that are considered critical shall be conducted in the vicinity

of a suitable landing area." All checklist items shall be conducted in VMC.

- d. Applicable portions of the FCF checklist shall be completed during the flight. The completed checklist shall be thoroughly debriefed with, and turned in to QA.
- e. A failed/incomplete FCF may be re-flown with a checklist tailored by QA, deleting items previously completed, provided the flight is flown by the FCF pilot who originally flew the FCF. If the FCF is re-flown by another pilot, the entire profile shall be completed.

10. Currency

- a. Without prior approval of the Wing Commander, an FCF shall not be the first flight of a pilot who has not flown a T-45 in more than 14 days.
- b. If a pilot has not flown an FCF in more than 90 days, a refresher FCF flight (A, B, or C profile) with an FCF stan pilot shall be flown.
- c. Pilots must complete annual FCF standardization exam within 60 days prior to their annual qualification anniversary.

11. Responsibilities

a. Squadron Commanding Officers:

(1) Recommend pilots for FCF training who meet requirements and have demonstrated appropriate maturity and judgment.

b. Wing FCF Program Manager:

- (1) Administer the wing FCF program and ensure the proper training of all FCF pilots.
- (2) Monitor the effectiveness of the FCF program and recommend changes as necessary to improve standardization, efficiency and safety.

- (3) Ensure proper documentation of all FCF training.
- (4) Ensure proper scheduling of all FCF training.

c. Primary responsibility for conducting FCFs resides with the aircraft maintenance contractor, per reference (h). However, the cognizant Training Wing reserves the right to conduct FCFs utilizing military FCF pilots as it deems necessary.
